

Course Provider: PowerComm Technical Ltd. is pleased to present an intensive and informative training course on the new API Specification Q1 - 10th Edition – Specification for Quality Management System Requirements for Organizations Providing Products for the Petroleum and Natural Gas Industry.

Course Outline: In three (3) structured course days you will receive intensive training on the API Q1 - 10th Edition requirements from an API Specification Q1 qualified and experienced instructor. The course will focus on providing the participants with an explanation of the requirements, interpretations and practical examples of the requirements as they apply in the oil and gas industry.

Information on the API Quality Management System Registration program will be provided for those seeking this recognition of their Quality program.

For those requiring API Monogram Licencing to API Product Specifications, Annex A of API Specification Q1 – API Monogram Program Requirements will also be covered on the third (3rd) day of the course. This includes detailed information on the API Monogram Program, Policies and Licencing Procedures that applicants need to know to ensure that their Monogram Program implementation, application, audit process and close out processes are effective, timely and successful.

This course is designed to be interactive with attendee participation in learning workshops and attendance is always limited to 20 participants to ensure effective interaction between the participants and the instructor.

Who Should Attend:

- Manufacturers and Service Providers in the Oil and Gas Industry
- Companies *Currently* API Monogram Licenced / QMS Registered
- Companies *Applying For* API Monogram Licencing / QMS Registration
- Quality System Auditors and Consultants in the Oil and Gas Industry
- End Users Specifying API Quality and Product Spec Requirements

The Instructor - Darryl J. Logan, C.E.T., P.A.

- Mr. Logan worked extensively over the last 5 years on the 10th Edition of API Q1 as a voting member on the API Sub-Committee 18 (SC18 – TG2). He is uniquely qualified to offer course participants valuable insight not only on the new requirements, but the intent of the API Q1 committee in making these changes.
- Mr. Logan is also an IRCA Certified QMS 2008/2015 Principal / Lead Auditor and a former API Monogram Program / QMS Lead Auditor for over 9 years. He previously qualified with API on over forty API Product Specs and has more than 25 years of Quality System Management, Consulting and Auditing experience including oil and gas equipment and OCTG manufacturing, product testing, regulatory consulting and electro technical consulting.
